# WHY A CARDINAL POOL?

Cardinal utilizes 14-gauge galvanized steel walls to build all inground pools that can be customized to the size and shape you desire. Precision and quality are what we strive for, and our total automation process during the fabrication of our panels lends well to this unmatched accuracy. Our walls are manufactured to exact building specifications for seamless installation every time. Customization doesn't end with steel, as Cardinal proudly offers vinyl liner installation for a beautifully designed finish to your pool.

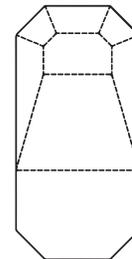

The many advantages and customization of vinyl liners make them a popular and ideal choice for inground pools. All Cardinal Liners are made with handcrafted precision to meet the exact size specifications of your pool. We offer a variety of patterns and colors to help match the aesthetic of your surrounding landscape. Cleaning, swimming & lounging are comfortable and hassle-free as all Liners are smooth and easy to clean, unlike the abrasive nature of concrete or tile. Each Liner has ultraviolet inhibitors and antibacterial agents to help ensure a long-lasting life, and is backed by a 25-year limited warranty.

Along with the mentioned amenities on the next page, you can make your swimming pool the centerpiece of your backyard. We understand each pool is an investment, which is why we go above and beyond to ensure we deliver when it comes to producing high-quality products and providing superior customer service. As a family-owned business, we understand the value and importance of having a space to create memories for the lifetime of your home. That's why whether you're looking for a backyard paradise to gather with friends and family, a space to exercise and improve your health, entertain for every occasion, or simply escape away from the stress of everyday life, a Cardinal Pool is the ideal choice for you.
