Steps

The top half of the image features several technical line drawings of pool step components. These include individual rectangular sections, corner pieces, and a larger curved section, all shown in a perspective view. The drawings are rendered in a light blue color against a dark blue background.

S T E P I N T O P A R A D I S E

A photograph of a swimming pool with a custom step. The pool is filled with clear blue water, and the step is visible in the center. The pool deck is made of light-colored tiles, and the surrounding area is paved with bricks.

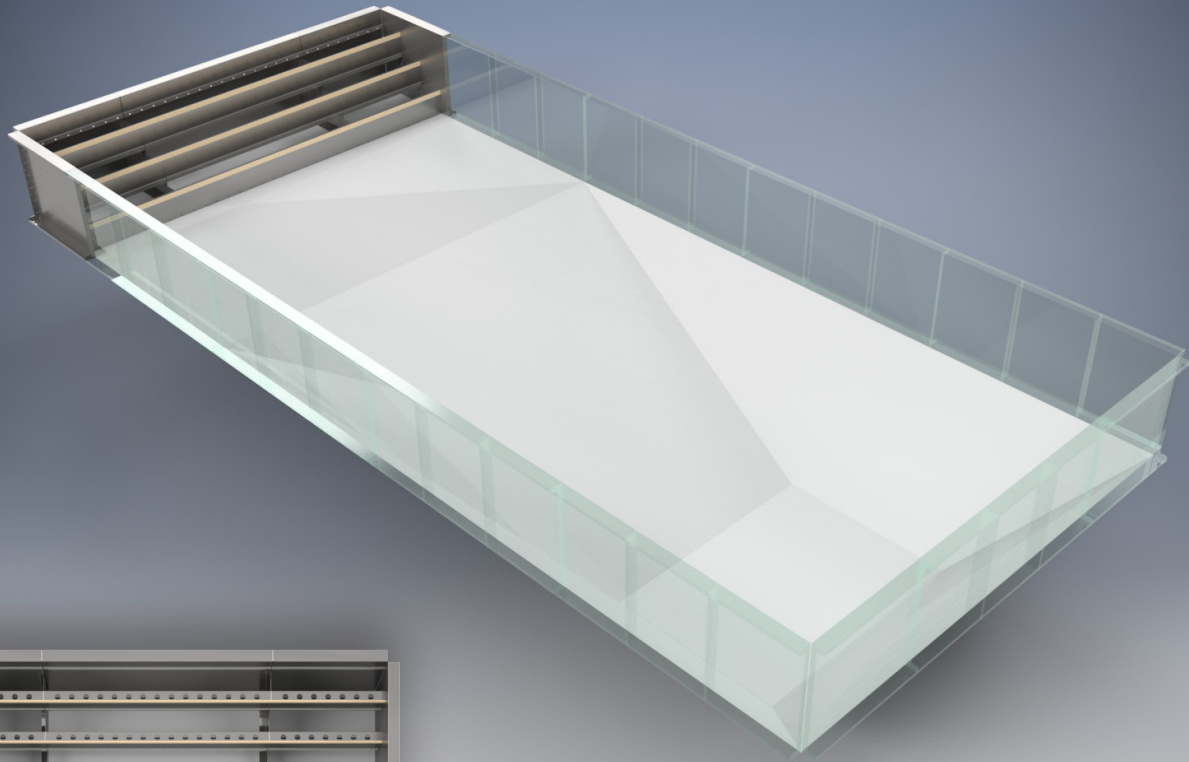

HOW IT WORKS

Customization is the Cardinal way, and our Modular Steps are no exception. We want you to have the ability to build your dream pool, no matter the size and shape. This requires the flexibility and freedom to customize stairs, sundecks, and benches to meet a pool's functional and aesthetic needs.

Understanding that each pool is unique to its landscape and customer, the Modular Step system allows for an extended entry way to fit essentially any pool width.

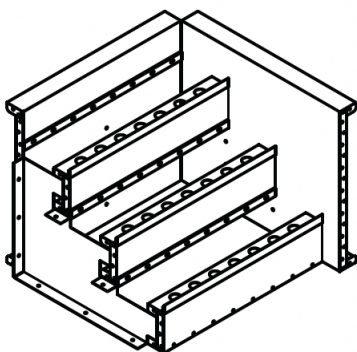

2 corner pieces are chosen, a left and a right, followed by the appropriate quantity of middle sections to ultimately create an extended step module to fit a pool's specifications. Available in open-pour step options in a variety of designs, a Modular Step is the ideal choice for an elegant entry experience.

All steps are manufactured in 14-gauge galvanized steel or ZAM corrosion resistant steel, and include aluminum liner track for easy liner installation.

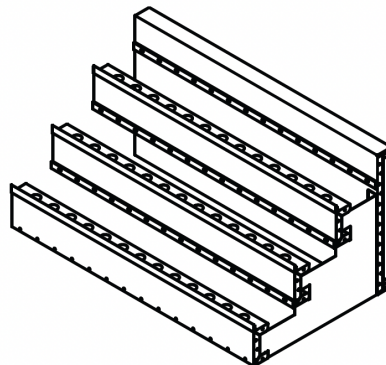

CUSTOM ENTRY EXPERIENCE

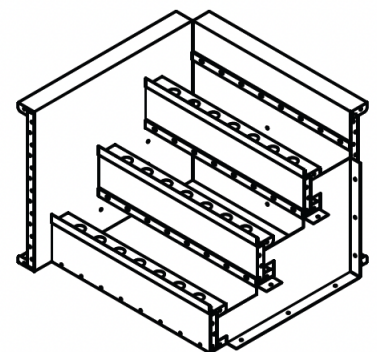

Perfectly straight, liner covered steps or sundecks are the simple and elegant solution to creating the appropriate entry for a wider pool. Allow our Cardinal pool experts to help you choose the 'middle' sections or sundeck widths to fill the entry from corner to corner.

TRULY MODULAR

Adding different corner options gives your pool entry **more dimension, versatility, and visual movement.**

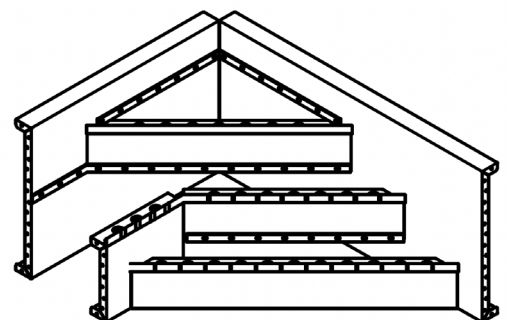

The most cohesive example of the Modular Step system, you will be choosing a left and right corner, and appropriate amount of middle sections to create one elongated, uniformed structure for your pool.

CUSTOM ENTRY EXPERIENCE

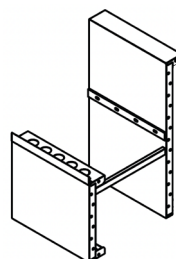

Customization is the Cardinal way, and that extends to our Modular Step system. You are not limited to the width of one end of the pool; push the boundaries of design and allow our CAD Team and Engineers create a Modular system that extends the length of your pool. **With a variety of step, sundeck, and corner combinations available**, the possibilities are endless when it comes to making your pool entry completely unique.
